## **ABU GARCIA SALTY STAGE LIGHT CASTING** CARBON WRAP TECHNOLOGY & ADVANCED LIGHTWEIGHT MATERIALS

The driving force behind the development of Salty Stage light casting rods was to produce a lightweight, high performance series designed for Australian fishing techniques that could be matched with Revo spin and low profile reels. Working closely with Abu Garcia Japan, Australian engineers set out to develop the ultimate in light casting performance rods.

The Salty Stage Light Casting series combines local knowledge and expertise with the best in super lightweight rod design and components. The result is a range of regular and extra fast action rods designed for Australian Light Casting techniques featuring the latest in Japanese design, quality components and striking cosmetics.

Powerful composite blank construction provides the optimum combination of tip action and backbone power. Further increase in blank performance is achieved with carbon X WRAP technology. The cross wrapped carbon reduces rod twist increasing torque and power while also increasing compression strength.

The Salty Stage Light casting series incorporates the highest quality Fuji components. The lightweight properties of the Fuji K SiC concept guide system retains the natural blank action while providing tangle free casting performance. All models are fitted with Fuji ECS/VSS graphite reel seats for increased blank contact and sensitivity and feature the latest carbon fore-hood design for improved reel fit.

Salty Stage rods feature a sophisticated Hybrid Cork/EVA grip design that delivers a lightweight and ergonomic grip system developed for unparalleled comfort and control.

Consisting of 5 spin models and 2 baitcast models, the Light Casting series focuses on advanced lure casting techniques. Spin models include ultra light 1-3kg models through to a medium 4-7kg model. Designed for Bream & Bass through to Snapper. The 2 low profile models at 3-5kg and 4-8kg are designed for bass and barra.
