

2016 new product

SKID JIG

A completely new style of jigging. While the typical metal jig catches fish after it touches the bottom or during retrieve. The Skid Jig is designed to catch fish even when it is falling by its 'switch back' action immitating squid attacking bait fish. It also, mimicks a squid skidding from side to side when its in distress and the skidding motion, creates lots of flashes in the water. The action is unique as it has a consistent straight falling action, avoiding the rotating action that frequently occurs in other metal jigs. Available in 80, 100 and 150gram weights and finished in an array of amazing colours.

RRP FROM \$12.95
